Official Cooperation Partner

Dear All,

*The fruit and vegetable trade is marked by large fluctuations in supply and demand. In this business no year is similar to any previous one. This requires particular effort from market participants, as decisions on purchase and sales planning are usually taken in a state of permanent uncertainty, when factors that may affect the market in the near future can never be predicted. Weather, political turmoil, COVID-19, transport problems and upcoming inflation expectations will have a major impact on the fruit and vegetable trade in Europe in 2022.*

*Differentiating offers and diversifying suppliers will be an important task for every company in the industry this year.*

*The **Fresh Market Guide 2022/23** fruit and vegetable supplier catalog will help you in this task.*

*We invite you to browse through the content of the catalog, which will remind you of the well-known, reliable suppliers, as well as suggest new companies that may offer very interesting products. You can meet representatives of the companies featured in the catalog on 21-22 April 2022 during the online Fresh Market B2B meeting, to which you are warmly invited.*

Best regards,  
**Fresh Market Team**

# ***Experience and high standards***

Baltic Berry, a Polish blueberry grower and exporter, is run by family members knowing how to do it and do it right.

Baltic Berry is a Polish blueberry farm run by a family of producers. They have supplied their fruit to the most demanding European and Asian markets and retailers gaining experience and know-how on quality maintenance, logistics and high standards of food safety. They have developed facilities including fast cooling chambers, mechanical sorter with heat sealer and CA cold stores. All this makes Baltic Berry one of the leading blueberry companies in Poland.

# Mini Kiwis on trend!

Kiwi berries are bite-sized fruits that look like a fusion of kiwifruit and grapes. They can be used in a variety of recipes — or eaten by themselves!

**Rafał Konopka**  
CEO  
MiniKiwi Farm

According to Rafał Konopka, who works for Polish producers MiniKiwi Farm, they'll have more mini kiwis available this year than they did last year: "Based on the data of the MiniKiwi Growers Association in Poland, the acreage in Poland is approximately 50 ha. Our plantation is nearly 10 ha and is the largest in Poland. We expect a harvest of 30 tons of mini kiwis. This is an increase of more than 30 percent compared to the previous year, because we protected our plants against frosts better than we did last year."

The mini kiwis are not well-known in Poland yet, so MiniKiwi Farm aims to increase the popularity of the product this year, Konopka explains. "The season of availability and sale of mini kiwi fruit in Poland lasts for two months; September and October. In Poland, the recipients of mini kiwis are the largest retail chains and local retail recipients. The fruit is not as popular as blueberry as of yet, but this is something we're looking to change in the upcoming years. Nowadays, we focus on the domestic market, but once we're able to steadily produce a good amount and are doing well, exporting is definitely a sales potential for our company."

## What is the reason for the growing interest in this product?

The major difference kiwi berries and kiwifruit is that the berries have a leathery, smooth, green or red skin. Kiwi berries are rich in vitamins C and E and naturally low in fat, cholesterol and sodium. They're also an excellent source of fiber, magnesium and potassium. Kiwi berries taste best when ripe, or when the berry feels soft to the touch. Like most berries, they can be enjoyed at room temperature but last longer (up to a week) when refrigerated. They can also be frozen and added to smoothies.

As labor costs have increased, so will the prices for mini, Konopka states: "Prices are slightly higher this year due to the increase in labor costs which in turn had an effect on the packaging costs. The packaging costs increased by about 8 percent recently. However we're looking forward to a good season. We've secured good quality fruit and hope to receive greater recognition and acceptance of the mini kiwis by our customers."

Kiwi berries are a deliciously juicy fruit that does not have any fuzz on the outside and are smaller in size, making them easy to pop in your mouth or add to a recipe without much preparation. They're good for you, too!

# Vegetables of Premium Quality

Besides agronomic features such as yield and disease resistance, Hazera is focusing on qualities required by the fresh chain such as long shelf life, attractiveness, suitable for transportation, nutritional properties, and taste.

**Michał Taraska**

Project Manager

**Hazera Poland**

**H**azera – part of the Limagrain Group, a world leader in the seed industry – concentrates its efforts to recognise market trends and the needs of its customers. Apart from high quality seeds, the company offers assistance in the selection of varieties and provides guidance and support throughout the entire crop production cycle. In Poland the company has become known as a supplier of seeds for both indoor and outdoor crops. Every year Hazera invests nearly 20% of its turnover in research and new product development. We successfully introduced innovative products such as Rosamunda to the retail market. The premium pink tomato – Rosamunda - won the major awards such as the Fresh Market Award for Best Product of the Year 2019 and the Silver Pearl of the FMCG 2020. The buffalo-shaped fruit (Albenga type), with its intense shine and deep ribbing, looks great in commodity or organic packaging. The next tomato of the Albenga type in brown-black colour - variety EXP44423 is in the process of introduction at this moment. We are seeing a lot of interest from supermarket chains in speciality tomatoes. Goutine is another tomato variety in the premium class. It offers customers a particularly excellent taste and an attractive lobular look combined in a tomato of 90 to 120 gr. The exceptionally sweet yellow cherry tomatoes - Summer Sun - have also won recognition among consumers.

In cabbages, Callaway - flat deli white cabbage - has hit the retail market. It produces heads of 2-3 kg, characterised by a unique taste and crispness of the leaves and good storage potential. The other of our white cabbage with an original pointed head, Dutchman – also listed among delicatessen varieties - is popular abroad especially in Germany, Netherlands, UK, Italy and becoming interesting for our market and for consumers in Poland. The original shape of the head, ideal size (1.5 kg), intensively green and thin leaves and very good taste are its main assets.

Another crop but from the range of root vegetables is carrot. Consumers are more and more often looking for and choosing quality and tasty carrots. Special attention should be paid to Speedo and Polydor varieties. Speedo, an early variety is an exceptionally sweet, tasty, recommended for the fresh market, including bunching and ongoing sales. The late variety Polydor is a quality in itself.

# Consumer knowledge ensures value growth in fresh produce category

Stimulating growth by inspiring shoppers. Growers cooperative Growers United looks at, and responds to, what the consumer wants in order to increase value within the fresh produce category.

## Perry Dekkers

Commercial Director  
Coöperatie Growers United

**G**ood food in good hands. Cultivated by over forty growers united in a cooperative. Family businesses with years of experience, expertise of growing and a firm focus on the future. Amongst other things, the cooperative organises sales and monitors the quality of the fruit vegetables. Working together, being transparent with service providers and retail, all with the common goal of providing consumers with the tastiest and healthiest tomatoes, cucumbers, (sweet)peppers and aubergines. Cultivated in over 600 hectares of greenhouses in the Netherlands and originating from a partnership with Moroccan and Spanish growers. That is Growers United.

## Building value in fresh produce

Growers United's mission is for every type of consumer to be able to enjoy more healthy, trustworthy and delicious fruit vegetables every day, at various times throughout the day. The World Health Organisation (WHO) underpins the great importance of fruit and vegetables and recommends a minimum daily intake of 400 g or five portions. The fact is that most consumers do not reach the recommended 400 grams or five portions. In order to realise value growth, you have to align your product to the consumer. That's the challenge we share. That is why Growers United invests in shopper knowledge.

## Shopper knowledge

Our research carried out among shoppers in the Netherlands, Germany, UK, Sweden and Poland has shown that the sweet pointed pepper is often forgotten in shopping lists and overlooked in stores. Therefore, Growers United is committed to informing and inspiring through influencer campaigns, recipe boxes featuring pointed sweet peppers and promoting this vegetable as a quick snack. Consumers pick up on this and the growth of Sweet Peppers in retail is strong.

For Aubergine we know that this is still not a well known vegetable by the general public. However shoppers tell us they are willing to buy if they would only know what to do with an aubergine or how to use it. So, we set up inspiration campaigns together with our customers and we also do this in stores. As an example we are promoting the aubergine as a meat substitute or a delicious alternative on the barbecue. And it's working! Partly because of these joint efforts the penetration rate in the Netherlands rose to from 21% in 2018 to 28% in 2021!

For Tomatoes shoppers told us that they still use this mainly at lunch or dinner. In Poland the Tomato is often used at breakfast. We found out there is more opportunities for Tomatoes at different times during the day. This why Growers United launched its Tomato Times campaign with which we introduce the public to other meal and snack ideas with tomatoes.

## Partnerships

Informing, inspiring and activating. Aligning with trends and responding to different uses for the product. Growers United wants to achieve value growth by basing their thinking on the consumer perspective. Not on its own but in partnerships with retail and service providers!

## CRÜ

SPAIN

CRÜ is the new zucchini ideal to eat raw. CRÜ is full of nutritional properties that are maintained a 100% when eaten raw. CRÜ is easily recognized for its striped skin and attractive green color, followed by a smooth taste without any bitterness. Suffered and with a long post-harvest, CRÜ keeps his fresh appearance longer than other zucchinis.

B2B ONLINE MEETING BETWEEN FRESH FRUIT AND VEGETABLE SUPPLIERS AND BUYERS FROM EUROPEAN RETAIL CHAINS

FRESH MARKET

B2B MEETINGS & ADS

[www.freshmarket.eu](http://www.freshmarket.eu)

Agro Queens is a leading supplier of fresh fruit & vegetables with top product apples. Thanks to our location in the heart of Europe's largest apple-growing area, first-class technical support and many years of trading experience Agro Queens meets the highest quality standards.

We guarantee:

- Fixed prices and delivery on time
- Flexibility in logistic
- Products traceability
- complete pre-sales and post-sales service

The highest quality and safety of our products are proved by Global G.A.P. Chain of Custody certificate. We also implemented ORGANIC CERTIFICATE.

Anything is possible – let's save miracles for tomorrow.

We offer fresh conventional and organic fruit and vegetables, a full range of attractive packaging according to individual preferences.

We produce locally and sell globally. All of our products comply with provisions applicable in the European Union. We thoroughly control commodities and inspections are also conducted immediately before loading.

We operate for retail chains, wholesalers, distributors and processing plants. We provide our services mainly to the European Union countries.

We cooperate with reliable transport companies, thanks to which we can ensure timely supplies and care for the load.

GLOBAL G.A.P.

## Organic fruit

### Our advantages:

- certified apples sorting plant
- wide range of assortment
- following the trend
- 12 producers
- 250 ha of organic orchards
- Agronomic Supervisor
- flexibility

Agro Queens unite 12 certified producers. Total size of organic orchards is over 250 ha, the least producer has 10 ha, the biggest has 60 ha. The producers are supervised by Agro Queens agronomic specialist.

We cooperate with many companies in Scandinavia, Germany, Belgium, the Netherlands and France.

Agro Queens as the first exporter of organic fruit has a mission to create a knowledge of healthy products. Our company is precursor of the idea of organic apples production in Poland.
